Terms, Conditions and Directions

TERMS—Invariably cash, unless otherwise agreed upon. All orders to be sent C. O. D. must be accompanied with one-fourth the amount in cash. Remit by Money Order, Registered Letter or Bank Draft.

It is important that you order early. For the benefit of customers who wish to order early, but who do not care to spare all of the money when the order is sent, we will accept such early orders if 10 per cent of the amount is sent with order. We will reserve the stock for you. Balance to be sent when you order the stock shipped.

DIRECTIONS FOR ORDERING—Write name and address plainly. Always state distinctly the sizes and grades of stock ordered as per the grades given in this list. When named varieties cannot be furnished, we reserve the right to substitute such varieties as will fill the season as near as possible, unless prohibited in the order. Persons unacquainted with the different varieties will generally get a much better selection by leaving the assortment to us. Keep a correct copy of the order, so that when the stock arrives you will know exactly whether you get what you have ordered. If we make mistakes, they are accidental, and we wish to right them.

FREE FREIGHT, FREE EXPRESS—On all orders over \$10.00, accompanied by full remittance, we will **prepay** the Freight or Express charges to your R. R. Station, if east of Denver, Colo., and El Paso, Tex. Will prepay \$1.15 per 100 pounds to all points west of Denver and El Paso.

On orders amounting to \$25 or more at single, 10 or 100 rates, will pay Freight to any point in the United States.

THE PRICES are for the quantities named, but five, fifty and five hundred will be supplied at ten, hundred and thousand rates respectively.

PACKING—All goods are packed free. Notwithstanding this fact, we use the utmost care and pack according to the distance and to our customers' best interest. Everything is labeled.

OUR GUARANTEE—The fact that nurserymen, planters and fruit-growers of the country have ordered of us year after year, is as good a guarantee as can be given by any other nursery of thirty-four years' standing. But if any mistakes occur we will cheerfully rectify them.

We use the greatest care possible to have our stock true to name, and should any prove not true, we stand ready to replace it free of charge or to refund the purchase money, but do not hold ourselves liable for any greater amount than the first cost of stock that may prove not true.

All our shipments of trees will be accompanied by Certificate of Inspection of Prof. J. M. Stedman, Entomologist. Good stock, true to name, sold direct to the planter at reasonable prices is our aim.

OUR LOCATION is the very best for producing well ripened stock with splendid roots. Our facilities for prompt shipments are first-class and we have special low Express Rates.

Remember that we pay the Freight or Express Charges on all orders amounting to over \$10.00 and guarantee safe arrival of shipments.

We solicit Correspondence and personal inspection of our stock, confident that it will compare favorably with the best.

NEW HAVEN NURSERIES

(J. Bagby & Sons Co.)

New Haven, Missouri

Remarks on Varieties, Sizes, Etc.

We wish to say that the **small size trees are strictly first-class and well rooted**, and by many will be preferred to the larger size.

VARIETIES—So many ask, "What should I plant in my locality?" that we will here name a few of the popular and profitable sorts for general planting.

APPLES—Ben Davis, Jonathan, Mam. Black Twig, Gano, York Imperial, Rome Beauty, Wine Sap, Grimes' Golden, Maiden Blush, Yellow Transparent and Wealthy. This is our **Commercial List**. Others would add perhaps, **Arkansas Black, Ingram, Missouri Pippin, Duchess of Oldenburg, etc.** All of the above are good, profitable sorts, both for home use and the market.

PEACHES—If you want to market your fruit, avoid planting too many early sorts. **Reeves, Crosby, Carman, Family Favorite, Fitzgerald, Champion, Mixon Free, Stump, Elberta, Heath Cling, Chair's Choice, Capt. Ede, Gold Dust, Salway, Golden Gate and Crawford's Late**, are all profitable for market. Should early sorts be desired, **Triumph, Greensboro, Alexander and Sneed** are what you should plant. If for home use, plant general assortment, including above, for a succession. Be sure to include **Golden Gate, Queen and Carman**. The peach tree should have the shoots and branches shortened every year or two. The land should be kept in a high state of cultivation.

PEARS—The fact is more and more apparent that **Kieffer and Garber** will stay in the lead for **profit**. **Duchess, Seckel, Bartlett, Koonce, etc.**, should also be in most orchards.

CHERRIES—Early **Richmond, Dychouse, Montmorency, Wragg, English Morello (sour), Gov. Wood, Elton and Magann (sweet)**, do very well and are profitable. **Try the sweet variety—MAGANN.**

PLUMS—Wild Goose (native), **Common Damson, Shrop Damson, German Prune (European), Abundance, Wickson and Burbank (Japanese)**, are all good bearers and profitable. We consider the **Abundance, Wickson and Burbank** the **best** of the well-known **Japanese sorts**. Try some or all of the **Japan sorts**.

THINNING FRUIT—When the trees are heavily laden, the fruit should be thinned when about one-third grown, else the fruit will be poor and the trees injured. The necessity for thinning was fully demonstrated during the dry summer of 1901.

WHOLE ROOT TREES—Pear, Peach, Plum and Cherry trees are all grown on "whole roots." Our Apples are all so-called whole roots, grafted and planted so that the scion also roots. Don't pay extra prices for "trade marks." We give our customers the **very best**, and we don't ask **two prices**. A trial order will convince you.

Our shipments for Fall of 1905 and Spring of 1906 consisted of **over one million fruit trees**, which went to thirty-eight states and territories. A total of about fifty furniture car loads. Some of the materials required for the above shipments are as follows: 100,000 feet of lumber for cases; two furniture car loads moss and excelsior for packing roots of trees; 120,000 labels; 16,000 pounds of paper and twine. We are now growing on our premises over two million fruit trees, all clean and healthy; nothing over three years from bud or graft.

A Portion of Block of 250,000 Apple Trees.

Apple Trees

Our apple are all grown on Missouri River upland, on well branched whole roots, smooth, clean and well grown in every respect. **No better trees can be found anywhere.**

	Each	10	100	1000
1 year old, 2 to 4 feet.....	\$0.07	\$0.70	\$6.00	\$45.00

SELECT VARIETIES.

SUMMER APPLES—Benoni—One of the best summer sorts.

Carolina Red June (Red June)—Medium size; red, flesh white. Last of June.

Duchess Oldenburg—Russian—Medium to large size; skin yellow; streaked with red and somewhat blushed. Productive. August.

Early Harvest—Medium to large, bright straw color; flesh white. Tree moderately vigorous and productive; one of the best. First of July.

Keswick Codlin—Large, excellent for cooking; productive and early in bearing. July and August.

Spokane, Wash., May 10th, 1905.

The 3,000 Peach trees you shipped me sometime ago were very satisfactory indeed. The inspection laws are very strict here and our inspector threw out only 18 of the trees.

Yours truly,

W. S. HOYT.

Apple Trees—Continued

Red Astrachan—Large, crimson, handsome; rather acid, but good and crisp; profitable. Early.

Summer Queen—Medium to large; surface yellow, blotched and streaked with red; flesh yellow. August.

Yellow Transparent—This valuable Apple is said to be of Russian origin. However, we find it to be a very valuable addition to our list. Fruit medium to large; nearly white.

FALL APPLES — Maiden's Blush—Rather large, evenly shaded red cheek or blush on a clear pale yellow ground; bears large crops. August and September.

Rambo—Medium; streaked with dull red and somewhat dotted, productive and vigorous. September to November.

Rome Beauty—Large, yellow, shaded with red; tender, juicy, sub-acid. October to February.

Wealthy—An apple of fine appearance and quality, an early and profuse bearer; a good market apple of its season. Tree hardy; in size and beauty it equals Baldwin, and is a better dessert apple. Ripens here in August. Winter apple North.

WINTER APPLES—Arkansas Black—Origin Bentonville, Arkansas. The tree is a beautiful upright grower, young wood very dark. Fruit medium to large; fine flavor; beautiful dark color, almost black; flesh yellowish, slightly sub-acid, crisp. One of the best cooking apples; vigorous. January to May.

Ben Davis—Fruit medium to large, flesh white; an excellent variety. Tree very hardy, a free grower, coming into bearing early, and very productive; very popular. December to March.

Bellflower—A well-known popular sort. October to February in Missouri.

Clayton—Large, conical, flattened, regular; red, with darker stripes; flesh yellow, breaking sub-acid. Tree a strong grower, long lived. December to March.

Grimes' Golden—Medium to large; rich golden yellow; flesh tender, mild, sub-acid. Should be gathered before turning yellow and put in a cool place, and often keeps until February. For canning purposes it nearly equals the pear. Tree hardy, vigorous; an early and abundant bearer. November to January.

Huntsman's Favorite—Originated in Johnson County, Missouri. Very large; golden yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest selling market apples; tree very healthy and moderately productive. November to January.

Gano—This apple was introduced to the public in 1886. Tree very hardy; it bears very young. Fruit bright red on yellow ground, no stripes; large, oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as a stand fruit; flesh white. An early, annual and prolific bearer. December to May.

Gilpin (Little Red Romanite)—One of the best late keepers.

Ingram—A seedling of the old Janet. Originated near Springfield, Mo. Its habits are similar to the Janet, but the tree is a more upright grower, and the apple is not subject to crack. Size medium; striped bright red in the sun; flesh greenish yellow, agreeable, sub-acid flavor; good keeper. Tree hardy, late bloomer and very productive.

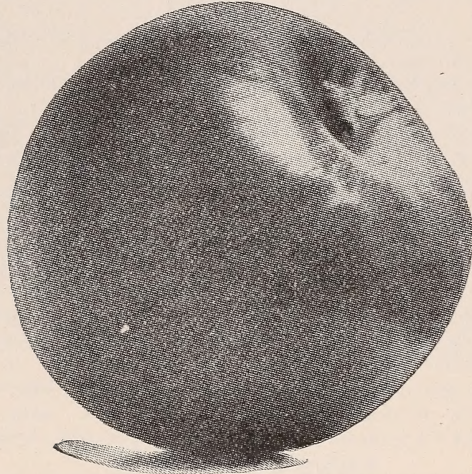

Janet—(Rawle's Janet)—Medium, roundish, greenish, yellow, striped with red; rich and juicy, one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

Apple Trees — Continued

Jonathan—Fruit medium, roundish; skin yellow, nearly covered with dark or lively red; moderate grower. One of the best apples for home use or market. October to January.

Mammoth Black Twig—Supposed to be the seedling of the Wine Sap, but tree a better grower in the nursery and fruit much larger; or, in other words, an improved winesap. Tree a fine, upright, spreading grower.

Missouri Pippin—Large, oblong, bright red, with numerous gray dots; very handsome, fair quality, an early and very abundant bearer, and very profitable. December to March.

Jonathan.

Payne's Keeper—It is a magnificent winter apple, selling higher than any other variety on the market. Our stock is from the original orchard of the Payne Sisters, near Everton, Mo. The tree is a slow grower in the nursery, and we offer 2-year-olds, 4 to 5 ft., at 20c each, 10 for \$1.50, 100 for \$12.00.

Salome—A northern Illinois apple, said to be very hardy, bearing early and abundantly. Resembles the Janet in size and color; a good keeper. January to April.

Talman's Sweet—Medium; pale yellow, slightly tinged with red; firm, rich and very sweet; valuable baking apple; vigorous and productive. November to April.

Winesap—Medium, dark red; a favorite market variety in the West. November to April.

Wolf River—Very large and handsome; flesh whitish, sub-acid, a good bearer. November and December.

Willow Twig—An old sort; large and profitable where not inclined to blight.

York Imperial—This apple has been gaining in favor, and is being planted largely in the West as a commercial sort. Large.

We also grow **Northwestern Greening, Western Beauty, Snow, Baldwin.**

We pay the Freight on all orders amounting to over \$10.00. Get your neighbors to join with you in an order.

Crab Apples—Hyslop, Whitney, Transcendent, at same price as other apples.

Peach Trees

We are the largest growers of Peach Trees in the West and can supply in any quantity—the best **up-to-date market sorts**. Our Peach are stocky, nicely headed, smooth, straight bodies, well rooted, on healthy Peach stocks and free from any disease. Remember this in comparing prices with other establishments. **Freight Paid to Your Station**, on conditions mentioned. Prices as follows, unless otherwise indicated:

	Each	10	100	1000
1 to 2 feet, well rooted, 1 year from bud.....	\$0.06	\$0.50	\$5.00	\$30.00
2 to 3 feet, well rooted, 1 year from bud.....	.08	.75	6.00	40.00
Medium, 3 to 4 feet, nice, well branched.....	.10	.90	7.00	60.00
First Class, 3½ to 5 feet, nicely headed12	1.00	9.00	75.00
Extra Select, 4½ to 6 feet15	1.25	10.00	90.00

SELECT VARIETIES.

Alexander—Large size, handsome and regular in form, with deep maroon shade; adheres to the stone; should remain on the tree until fully ripe. White flesh. Last of June.

Brigg's Red May—Medium size, very highly colored; flesh greenish white, very juicy, vinous, and of very good quality; adheres somewhat to the stone; of firm texture; tree very prolific. July 25th.

Champion—Originated at Nokomis, Illinois. Fruit large, beautiful in appearance; flavor delicious, sweet, rich and juicy; skin creamy white, with red cheek; free-stone. August 15th.

Chinese Cling—Most popular Southern peach, oblong, creamy skin, with faint flashes of red. August.

Crawford's Early—This beautiful yellow peach is highly esteemed for market purposes. Fruit very large, oblong, skin yellow, with fine red cheek; flesh yellow, juicy, sweet and excellent, free. Last of July. Would not advise planting this sort north of Central Missouri.

Crawford's Late—Fruit of the largest size; skin yellow, or greenish yellow, with dull red cheek; flesh yellow; productive; one of the best; free. August and September.

Chair's Choice—Large, late, yellow. One of the best for home or market planting.

On Club Orders amounting to over \$25.00, 10 per cent additional in stock will be allowed.

Ralls County, Missouri, August 1st, 1904.

I wish to say I have been buying and planting trees for nearly thirty years. In that time I have bought fruit trees from many nurseries, but I can, in all candor and truth, say you are the only people from whom I have bought trees where the trees were always true to name and possessed all the qualities of first-class stock. I am somewhat particular, but in our dealings for over thirteen years there has never been a point of difference between us. You have a good name and you deserve it. It has been honestly won.

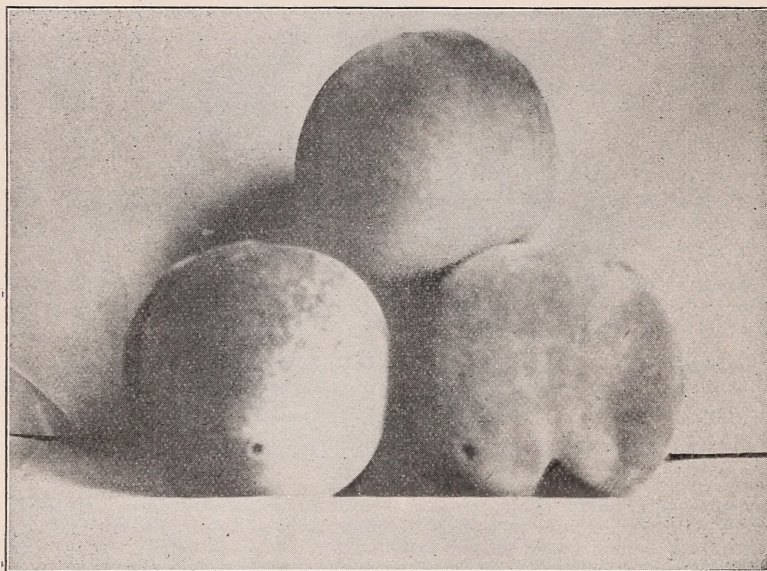

R. DALTON.

Peach Trees—Continued

Capt. Ede—Originated on farm of Capt. Ede in Illinois. Is a splendid yellow free-stone variety. In appearance very much like Elberta, which it equals in every way, except not quite so large, and is better quality.

Crosby—If you want peaches every year, try some Crosby. It is medium size, rich orange yellow, splashed with red and of best quality. Mid-season.

Elberta—A Georgia cross between Crawford and Chinese Cling, very large, well colored; all things considered the finest yellow free-stone in cultivation; no one can go amiss by planting it; fruit perfectly free from rot, and one of the most successful shipping varieties. August 20th.

Gold Dust.

Emma—A popular new sort of Southern origin.

Family Favorite—Free, seedling of Chinese Cling, of better color, large, clear, waxy complexion, with blush, prolific, firm, valuable for shipping, canning or drying. Last of July.

Foster—Same season as Crawford's Early, but much more productive; yellow, with red cheek; quality best; good size.

Gold Dust—If you want the very best canning variety, this is the peach. Large yellow cling-stone; juicy, productive and of best quality. Season, September 1st to 10th.

Globe—An improvement on Crawford's Late; fruit large, globular, of a rich golden yellow with a red blush, flesh yellow, juicy. Not very hardy. August.

Henrietta (Levy)—Magnificent yellow cling, large size, mostly covered with bright crimson; hardy, productive; always commands fancy prices. September 25th.

Heath Cling—Large, oblong, creamy white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

Mountain Rose—Large, red; flesh white, rich, juicy, excellent. Season, August 1st.

Peach Trees—Continued

Miller Cling—An extra large cling-stone. Hardy, productive, and of best quality. We consider it the best white cling-stone, ripening early in September.

Muir—A small yellow free-stone. Hardy; productive. September.

Old Mixon Cling—Large, with red cheek; juicy, rich and high flavored; one of the best cling-stone peaches. White flesh. August 15th.

Old Mixon Free—Large, white flesh, with deep red cheek; rich and good; one of the best. August.

Ringgold Cling—Much larger than Heath, every way an improvement on that popular kind. September.

Reeve's Favorite—Flesh yellow, tree hardy and productive; unexcelled quality; one of the best and most reliable yellow market peaches. Season about August 10th. Not quite so hardy as Elberta.

Salway—Fruit large, yellow, with red cheek; flesh yellow, a late showy market sort; free-stone. Last of September.

Smock Free—Fruit large, skin orange yellow, mottled with red, a good market sort. September 15th. Hardy.

Sneed—Ripens earlier than Alexander, and belongs to an entirely different type; it is very distinct in tree and fruit, belonging to the Chinese Cling type; size medium. Hardy.

Stump the World—Very large, roundish; skin white, with a bright red cheek; flesh white; free-stone. End of August.

Susquehanna—One of the handsomest peaches; large, yellow flesh; rich and good; free-stone. September.

Thurber—A seedling of the Chinese Cling, which it resembles in size and color; skin white, with light crimson mottlings; free-stone. Ripens in August.

Triumph—The earliest yellow peach known; productive, hardy and profitable for market. Originated in Georgia. Hardy.

Wonderful—Color rich yellow; flesh yellow, highly flavored, firm. Ripens in September. Very similar to Smock.

Wheatland—Large, roundish, skin golden yellow, shaded with crimson on the sunny side; flesh yellow and of fine quality; tree vigorous. August and September. Just ahead of Elberta.

SPECIAL SORTS.

	Each	10	100	1000
4½ to 6 feet, select, ¾ up	\$0.25	\$1.60	\$11.00	\$100.00
3½ to 5 feet, first class25	1.25	9.50	75.00
3 to 4 feet, well branched15	1.00	8.00	65.00

Athens—One of the finest yellow clings in existence. Very large, hardy and productive. Season, September.

Barnes—A late Blood Cling. Season, October 1st.

Carman—White flesh, large, with beautiful mottled red cheek. A valuable home or market sort. Season about ten days later than Alexander and about two weeks earlier than Elberta. Our stock came from the originator.

Fitzgerald—Of Crawford type. A seedling found at Oakville, Ont., where it stands the winter perfectly, is undoubtedly very hardy. Quality first-class, free-stone, and we recommend it with entire satisfaction.

Golden Gate—Originated by Dr. Smith, of Hermann, Mo. Very productive, large, beautiful yellow. Season a week later than Elberta. Tender in bud.

Queen—A very late September variety. Originated in Howell County, Missouri; free-stone, white flesh, red cheek.

Lady Ingold—In great demand as a popular market sort. Yellow. Free.

Miller Cling Peach—An extra large cling-stone. Hardy, productive, and of best quality. Earlier season than Heath Cling, but large and better color.

Matthews Beauty—Originated in Georgia. A late yellow free-stone. Fully as large as Elberta and two weeks later. Would advise extensive planting of this sort.

Plums

Small Size Trees, 2 to 3 feet20	1.50	10.00	85.00

OUR SELECT LIST OF VARIETIES.

Abundance—A hardy, productive Japanese sort. Large, purplish red; quality very best. Season, early in July.

Burbank—Large, varying less in size than the other Japanese Plums; it is nearly globular; clear, cherry-red, with a thin lilac bloom; flesh deep yellow, firm and meaty, tree vigorous and productive.

Common Damson—Well-known and very productive. Season, September.

Golden Beauty—Round, rich golden yellow; very firm; small seed, nearly free, excellent in quality; immensely productive. September.

German Prune—Very profitable, and will succeed wherever Common Damson can be grown. Very large. We consider it the best of European sorts. August and September.

Ogon—It is large, nearly round; of the brightest golden yellow; flesh firm, sweet, rich and dry; ripens a little earlier than Abundance or Botan. Free-stone.

Red June—One of the largest Japanese varieties. Ripening before Abundance. Tree upright, vigorous, hardy.

Shropshire Damson—A plum of fine quality, sprightly. In market it has commanded nearly double the price of the Common Damson, and is enormously productive. Last of September.

Willard—One of the imported Japanese varieties, ripening before Abundance. When ripe is dark red. Very early, but poor quality.

Wild Goose—Large, rich, crimson, beautiful flesh, soft, rich, melting, delicious, with a full, fruity flavor. Tree a strong grower, prolific. The variety is among plums what the Ben Davis is among apples—referring to the American class of plums. July.

Wickson—We regard this as one of the best of the late ripening Japan sorts. Readily parts from the seed. Extra large. Season, August.

Standard and Dwarf Pear Trees

Our Pears are especially clean, smooth and well rooted, grown on XX French imported stocks. Varieties marked D. and S. can be supplied in either standard or dwarf.

	Each	10	100	1000
Leading sorts, first-class, 5 to 7 feet, 2 yrs...\$0.40		\$2.50	\$20.00	\$170.00

Leading sorts, 1 year, 3 to 4 feet.....	.25	1.50	12.00	100.00

PEARS—SUMMER.

Koonce (S)—The handsomest, best and most valuable; very early pear; tree vigorous; upright grower; free from blight; magnificent foliage, which it retains late in the season; fruit medium to large; skin yellow, does not rot at the core, juicy, spicy, sweet and delicious quality; and excellent shipper.

Bartlett (D. S.)—Large, skin very thin, clear lemon-yellow with soft blush on the sunny side; flesh white; buttery, very juicy and highly flavored; the best summer pear in existence for quality.

Clapp's Favorite (D. S.)—Large, pale lemon-yellow, marbled with crimson on sunny side and thickly sprinkled with brown dots; flesh finely grained and melting, with a rich vinous flavor. August.

Seckel (D. S.)—This small but most delicious pear originated on the farm of Mr. Seckel, near Philadelphia. Its highly concentrated, spicy, honeyed flavor is not equaled by any other variety. Skin brownish-green, with a russet-brown cheek; flesh whitish, buttery, juicy and melting.

PEARS—AUTUMN.

Buffum—Medium size, yellow, somewhat covered with reddish-brown and russet; buttery, sweet and excellent; a stout and upright grower.

Duchess d'Angouleme (D. S.)—Very large; greenish-yellow; sometimes a little russeted; makes a beautiful tree; does best on quince. One of the best. October and November.

Garber—Originated in Pennsylvania 23 years ago, is large and beautiful, bright yellow with red; juicy and good; delicious canned. Ready to pick with Le Conte, or a few days later, and much better, not only in fruit, but in hardiness and health of trees.

Flemish Beauty—Large, beautiful, juicy, melting, rich and fine; strong grower and good bearer; hardy everywhere. September and October.

Howell (D. S.)—Large, light waxen yellow, with fine red cheek; handsome, rich, sweet, melting, perfumed aromatic flavor. Tree an upright, free grower, an early and profuse bearer. Very hardy and valuable. September and October.

Kieffer's Hybrid—Tree a remarkable grower, with so vigorous a constitution that it rarely, if ever blights. Fruit of fine size, rich color and good quality. Brings high prices in competition with other varieties. Best when picked at maturity and house-ripened. October and November.

Cherry Trees

Our Cherry are all budded on Imported French Mahaleb and Mazzard stock. They have fine roots and nice heads. All well rooted and will be graded full size indicated, and up.

	Each	10	100	1000
Leading sorts, extra select, 4 to 6 ft.....	\$0.40	\$3.50	\$28.00	\$240.00

Leading sorts, small size, 1 yr., 1½ to 2½ ft.....	.20	1.50	12.00	100.00

OUR SELECT LIST OF VARIETIES.

Baldwin—A new variety of great promise, hardy and said to be productive.

Dyehouse—Very early and sure bearer; ripens before Early Richmond; but not quite as productive. May.

English Morello—Medium to large; blackish red; acid; juicy. Very productive. July.

Early Richmond—(Kentish, Virginian or Early May)—Medium size, red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is exceedingly productive. First of June.

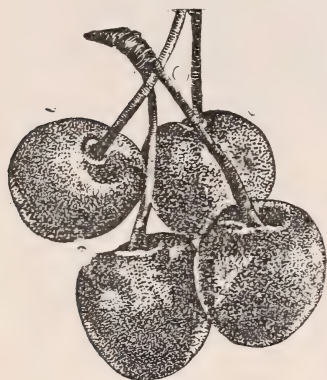

Elton—A splendid sweet sort, about ten days later than Gov. Wood, which it somewhat resembles.

Gov. Wood—One of the best cherries; very large, light red, juicy, rich and delicious. Tree healthy and a great bearer. May and June.

Montmorency—No doubt one of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young, and is loaded annually thereafter with fine crops; fruit of good size, fine flavor, and of bright, clear, shining red; valuable everywhere, especially for northern latitudes; larger than Early Richmond, and fully ten days later. End of June.

Magann Cherry—A new sweet cherry. Fruit large, almost black when fully ripe, growing in large clusters. It will pay you to include some of these in your order for other stock.

Wragg—Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the high latitude and prairie regions of the Northwest.

May Duke.

DISTANCES FOR PLANTING.

Standard Apples	30 feet apart each way
Standard Pears and strong-growing Cherries ...	20 " " " "
Duke and Morello Cherries	18 " " " "
Standard Plums, Apricots, Peaches, Nectarines...	18 to 20 " " " "
Dwarf Pears	10 to 12 " " " "
Grapes	rows 10 to 16 feet apart, 7 to 16 feet in rows
Currants and Gooseberries	3 to 4 feet apart
Raspberries and Blackberries	3 to 4 by 5 to 7 feet apart
Strawberries, for field culture	1 to 1½ by 3 to 4 feet apart
Strawberries for garden culture	1 to 2 feet apart

NUMBER OF TREES ON AN ACRE.

30 feet apart each way	50
25 " "	70
20 " "	110
18 " "	135
15 " "	205
12 " "	300
10 " "	435
8 " "	680
6 " "	1,210
5 " "	1,745
4 " "	2,725
3 " "	4,840

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of square feet in an acre (43,560) will give the number of plants or trees to the acre.

Our Illustrated Fruit Book, "Among Our Customers," will be sent to all who have not received a copy. Write for it.

Extract from paper read before the Missouri State Horticultural Society at New Haven, June 5th. Suggestions on Peach Culture. By W. R. Wilkinson, President State Board of Agriculture and Vice-President Apple Growers' Congress:

I prefer Missouri-grown trees, one year old from bud, and know of no better nursery than the one situated right here in New Haven, Mo. I have bought thousands of these trees from them and have always found their output true to name, and good trees in every respect.

What Some of Our Customers Say

"Our trees arrived in excellent shape. You can look for more business from this part next year."

J. J. Britt, Benton County, Ark., November 22, 1904.

"The 10,000 peach trees arrived a week ago. All in good condition and a very fine lot of little trees. They look to be all Elberta. The entire 10,000 all go to one man, all set in one orchard and I had to give him my guarantee that they are Elberta, and this is the reason I ordered them from you. I could have bought them a little cheaper, but I thought I'd run no risk if I bought from Bagby & Son."

J. A. Durkes, Platte County, Mo., March 30, 1904.

"Have received the trees, and they opened all right in perfect condition. Am well pleased with them."

Prof. W. L. Howard, Columbia, Mo., Nov. 20, 1903.

"The two boxes of trees arrived in good condition. The trees are about the size that I desired; in the main they are entirely satisfactory."

W. G. Gano, Parkville, Mo., August 17, 1904.

"Trees checked out all O. K. Splendid trees. Grade and promptness could not be better. All the trees we have bought of you have proven to be very vigorous and healthy and true to name."

C. H. Dutcher, Warrensburg, Mo.

"My dealings with your firm have always been highly satisfactory."

W. Q. Daniels, Jefferson County, Kan.

"Have planted 2,000 trees from your nurseries in the past five years, all of which have given perfect satisfaction. Have planted trees from other nurseries besides yours. The other fellow's agent had to admit your trees were the best. Expect to continue to deal with your firm."

J. T. Sharp, Montgomery County, Ill., April 5, 1904.

"The Kieffer trees arrived in good shape and am very much pleased with them."

Chas. E. Hill, Muskegon County, Mich.

"The stock I ordered of you was shipped March 19th, received here April 4th. The floods throughout the country I think was the cause of the delay. Stock arrived in fine condition. Must confess I am very much pleased with it. It have notified several parties who are interested in your stock to examine it."

O. S. Claggett, Suffolk County, Long Island, N. Y.

"I received the box of trees and have them all set out in an orchard, and am well pleased with them all. They are a fine lot of trees, all in fine order and in good shape; in fact, the best lot of trees I ever saw. Our neighbors all say they are a fine lot of trees; good roots and all."

S. Stonerod, Mifflin County, Pa.

"Your trees received; they are fine. Surely it's no wonder Eastern nurserymen are buying Western trees by the carload, if you can produce such trees at the prices you now offer."

O. G. McKinley, Jefferson County, Pa.

"I received the trees in good order and am well pleased with them."
Montgomery County, Ill., April 4th, 1905.

Clark County, Ill., April 26th, 1905.

Bagby & Co.:—I received my trees from your nursery all right, and will say they were nice trees, being very carefully packed. This is the second time I have ordered trees from you, and both times I have received the best trees I ever got from anyone, and have received them in excellent condition.

Yours truly,

LAFAYETTE PERISHO.

Our sales in Illinois in past six years have exceeded 450,000 fruit trees.

Grant County, N. M., April 5th, 1905.

Dear Sirs:—I received the trees O. K. I am well pleased with trees and will give you another order next winter. Very truly, W. C. FRANKS.

Scotland County, Mo., April 15th, 1905.

J. Bagby & Sons:—Trees received in good shape and the men are well pleased with the quality. They say they are the best that they ever bought. I worked for — two or three years. The trees you sent are the best I ever handled, and have handled thousands of trees.

Yours truly,

G. W. WILKINSON.

Graves County, Ky., April 17th, 1905.

Gentlemen:—My trees reached me April 5th, and I have about 100 trees left. I shall order earlier next time. My customers are very well pleased. Will you sell me stock at the same price for fall delivery?

JNO. L. WRATHER.

Monroe County, Ia., April 6th, 1905.

Dear Sirs:—The trees seem to be all you recommend, and am well pleased with them, and if the season was not so far advanced I would order another lot of them.

Yours,

C. H. CLARK.

Armstrong County, Pa., April 20th, 1905.

Gentlemen:—Trees which arrived April 19th all in good shape, except one cherry tree which was broken off at bud. Every one is well pleased with the trees.

Yours truly,

SAM'L CALHOUN.

Alamance County, N. C., March 31, 1905.

Dear Sirs:—Trees came up all right. Nice trees, good condition, etc.
Thanks to you. Yours truly, J. W. INGLE.

Warren County, Ohio.

Gentlemen:—Received trees all right. Well pleased with them; they are nice ones and thrifty looking. Accept thanks for sending same promptly. I enclose railroad bill. M. WOODS.

W. S. Coburn, Delta County, Colo., April 22, 1905.

"Gents:—On my arrival home of the 10th inst. the three boxes containing 2,700 trees came to hand and were in very fine shape. Kindly send me bill and I will remit at once and oblige."

Jesse F. DeLassus, Perry Co., Mo., April 14, 1905.

"Gentlemen:—The apple trees you sent me last April have made a very nice growth. To prove to you that I know how to plant will say that out of 900 peach received from you and planted in spring of 1903, only one failed to grow."

J. W. Prouhet, St. Louis County, March 29, 1905.

"Dear Sir:—I received my trees and plants the 28th, and they are very fine and the count is all right."

J. W. Mayfield, Hill County, Tex.

"Sirs:—I received the trees today, and am well pleased with them."

C. G. Larabee, Sabine County, La.

"Yours of the 16th at hand, also trees. My box opened in good shape. The peach crop looks well. I have 1,200 trees to bear this year am thoroughly interested in getting my neighbors at it."

Our largest single shipment of one variety at one time was 80,000 Elberta to Jacksonville, Tex., Nov., 1902. These trees are all now in bearing.

Palisade, Colo., Jan. 25, 1906.

The Elbertas from your place set two years next spring, are the finest orchard of their age ever raised here in the "Home of the Peach," where they attain the highest perfection in the world. I value this orchard at \$1,000 per acre.
(DR.) J. H. DIVINE.

Over 200,000 Elberta from our establishment are in bearing in Western Colorado.

Fresno, Calif., Dec. 29, 1905.

The car of trees reached here Christmas night and we proceeded to unload same at once under the supervision of our local horticultural inspector. The car was beautifully packed, in fact, we never saw trees packed so nicely and thoroughly. They came through in prime order.

— NURSERY CO.

San Joaquin County, Calif., March 24, 1906.

Your shipment of trees to me arrived yesterday and I have carefully examined them and I will say that I am much pleased with them. I have never handled any Eastern stock but have seen quite a lot of it here, but have never seen any that equaled these. The shipment was nearly a month on the road, but the only trees that had started to grow were the Elberta and Mazzards, but not enough to hurt them. I sent the order only as an experiment and am well pleased with the class of stock you grow. If you can furnish such stock next fall I will want at least a car load of peaches, besides other stock.

T. J. STEPHENS.

Over 400,000 peach trees from our nurseries are in bearing in California.

Mrs. J. C. Frazier, St. Louis County, Mo.

"Dear Sir:—I thought I would let you hear from me in regard to how my trees got along. They did fine. Out of 600 apple, lost only four, and of the 600 peach only five. I had them well cultivated, the peach cut back to stumps of two feet and they made a wonderful growth.

Jacob Faith, Vernon County, Mo.

"Dear Sir:—Bill of trees at hand. Like all others heretofore, packed good and very satisfactory."

J. R. Ellis, Butler County, Ky.

"Gentlemen:—The trees arrived on the 17th. I have them all set in good shape, and can show to my neighbors, who have always bought of agents, the cheapest lot of nursery stock ever brought to this place. I am well pleased with them."

S. E. Carson, Independence County, Ark.

"Dear Sirs:—I am well pleased with my trees that I received January, 1905. Out of the 650 I only find 10 that are dead, but we did not have any rain or moisture of any kind from the middle of July until December 25th."

ABOUT AGENTS

We are not employing traveling salesmen to solicit orders, but we shall be pleased to have you get up a club among your neighbors, and on club orders amounting to \$25.00 or more, we allow you 10 per cent additional in stock. We put up each order in a separate package, so that upon receipt of the goods you have only to hand out the different lots as ordered. Many of our best customers buy in larger quantities at the lowest rates and distribute in lots as ordered by their neighbors.

We also desire to sell to nurserymen and dealers who buy to sell again, and special prices will be made on carloads or larger quantities than indicated in this list.

References—Some of our correspondents have asked us to give them bank references, and we hereby comply, and can also refer to other local banks and to the commercial agencies.

FIRST NATIONAL BANK

Washington, Mo.

TO WHOM IT MAY CONCERN:

THE NEW HAVEN NURSERIES of New Haven, Mo., have a paid in capital of \$60,000, and we know them to be thoroughly reliable in every way.

Established in 1872, they have by progressive methods, fair dealing, and the high quality of their stock, built up a trade which now reaches over the entire country, and places them in the front rank in the nursery business.

At no place do they bear a higher reputation or are held in better favor than in their own vicinity, where they are well known.

We take pleasure in recommending them to purchasers desiring to deal with a thoroughly reliable company. Respectfully,

E. C. STUART, Cashier.

We also refer to **Farmers' Savings Bank, New Haven, Mo.**, or any other local business firm, and to the commercial agency reports.

New Haven Nurseries

New Haven, Missouri

We mail this condensed list of prices to our friends and customers, and will ask that they favor us with their orders as early as practicable. The **Prices** are for the goods **at your station**, if your order amounts to \$10.00 or more. We have now growing in our nurseries over two million fruit trees by actual count. All clean and healthy. **Entomologist's certificate** with each shipment. No San Jose Scale, Yellows or Rosette has been found in this county.

Shipments to Pacific Coast and Southern States from our frost proof storage during winter months via Southern Routes.

Office—New Haven Nurseries.

We are growers of what we sell, having over 500 acres devoted exclusively to the nursery business. Many nurserymen are simply jobbers in the trade, and cannot sell stock with the same certainty of its being true to name and free from disease.
